

PLANS AND SECTION:

The plan of the building is divided into 4 sections. Retail, gallery, mechanical, and theater/restaurant are the 4 sections. The mechanical plenum is located below the building in an 8 foot high floor. Three building cores located in the retail, gallery and theater/restaurant bring the mechanical in to those spaces. The mechanical tower houses the cooling tower as well as main electrical/plumbing needs of the building. This tower is centrally located about the other building functions.
